Token	
Name:	Symbol:
Groestlcoin	**GRS**

Date Researched:
25 January 2018

Market Cap:
$70,402,914

Rating of development:
53%

Summary of project:
Groestlcoin is a multipurpose fast and secure coin with almost zero fees that is privacy oriented.

It is an ASIC resistance currency meaning that everyone with a normal computer can mine it and it is therefore highly profitable for all miners.

The Groestlcoin network is SEGWIT and Lightning Network ready simply meaning larger block sizes leading to very fast transactions.

The team does a major development every 3 months.

Product launch date:
22 March 2014

Backing:

Tauriga Sciences, Inc. has made a relatively small investment in Groestlcoin. The company has made the acquisition of patents and interests in intellectual property relating to blockchain, with an aim towards commercialization.

Tauriga Sciences is engaged in building business through the development, distribution, and licensing of proprietary products as well as the evaluation of potential acquisition opportunities or equity investments.

Token		
Name:		Symbol:
I/O Coin		**IOC**

Date Researched:
25 January 2018

Market Cap:
$73,707,843

Rating of development:
40%

Summary of project:
The focus of the I/O coin is to facilitate transactions between merchants and customers in a fast, effortless and secure way.

To achieve an optimal point of security and efficiency I/O Coin has adopted a proof of stake model for verifying transactions on the block chain. The proof of stake model is more energy efficient and economical than the proof of work used by bitcoin.

I/O coin has also developed a decentralized name server called D I/O NS. This allows you to register your username and match it to a hexadecimal wallet address. This means you can send and receive money using a human readable name. So you know who you making transactions with while maintaining privacy.

The team has developed Project Sunrise. This gives individuals and businesses access to all sorts of location-based services. Any individual can for example use Project Sunrise to send messages, store data, (such as legal documents) and send money to other Project Sunrise users all around the world.

Product launch date:
24 July 2014

Backing:

- KPMG the global audit and advisory firm.
- The coins advisors are linked to IBM and Keynote

Listed Exchanges:

- Bittrex

Token Name:	
Name:	Symbol:
Feathercoin	**FTC**

Date Researched:	
25 January 2018	
Market Cap:	
$53,949,037	
Rating of development:	
81%	
Summary of project:	

Feathercoin is a global payment network and cryptocurrency independent of any central bank or institution. Payments are fast, global, and secure with near zero payment fees.

The tiny fees allow vendors to sell cheaper than with traditional currencies, Therefore merchants do not have to pass on the cost of business onto the customer.

It takes about a minute to generate a block, confirming transactions in about one-tenth of the time as it does on the bitcoin blockchain.

Product launch date:	
16 April 2013	
Backing:	

No major investors, hedge funds have been disclosed. No advisors have also been disclosed.

Token Name:	
Name:	Symbol:
Trinity Network Credit	**TNC**

Date Researched:
25 January 2018

Market Cap:
$87,181,542

Rating of development:
37%

Summary of project:
Trinity acts as a lightning network for NEO in order to achieve real-time payments, low transaction fees, scalability, and privacy protection for NEO assets through off-chain and state channel technology. NEO is the Ethereum of China. Off-chain transactions are transactions not recorded directly on the blockchain but on a centralized database, and therefore transactions times improve as confirmations do not need to be done. In a state channel network individual transactions are not recorded on the blockchain instead a summary of the transactions between the parties is recorded in the form of one single transaction. Applications for Trinity include instant micro payments, high frequency privacy transaction and off-chain Neo scaling.

Product launch date:
11 January 2018

Backing:
No major investors, hedge funds have been disclosed. Advisors however include Jc Xu a co-founder of Badwater Capital (a digital currency fund).

Token Name:	
Name:	Symbol:
Hempcoin	**THC**

Date Researched:
25 January 2018

Market Cap:
$90,400,320

Rating of development:
58%

Summary of project:
HempCoin was among the first 30 cryptocurrencies developed in 2014 and is a highly focused digital currency for the agriculture industry in particular marijuana.
HempCoin is used to facilitate financial transactions between the hemp farmers and distributors. The coin can be used in all dispensaries to purchase medical marijuana. The coin can also be used to purchase equipment needed to farm and produce marijuana.
HempCoin is the only crypto currency for the agriculture industry. There is also a HempCoin ATM in Canada. The team has recently announced new website, white paper, complete rebranding, and fork update.

Product launch date:
9 March 2014

Backing:
It is backed by a publicly traded company, Rocky Mountain Ayre. Rocky Mountain Ayre through its subsidiaries, engages in food and hospitality, manufacturing, medical marijuana, and retail businesses.
